

NHS UPTAKE OF FLASH GM IN PRIMARY CARE

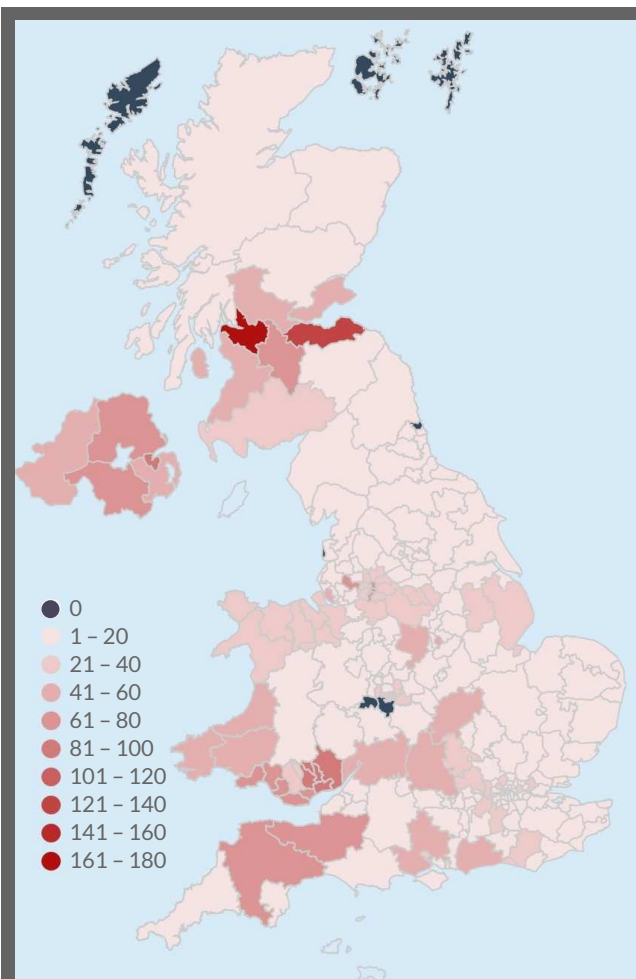

In data to August 2018, **3,860** unique practices across **214** CCGs and Health Boards have prescribed the FreeStyle Libre sensor since it first became available on prescription in the UK in November 2017.

GROWTH IN PRACTICES PRESCRIBING FLASH GM SENSORS

The number of new and existing practices prescribing each month versus the total number of practices who have prescribed the sensor suggests we are not seeing repeat prescriptions in all practices.
